

Sheet Feeder

A high speed sheet feeder with optional OMR capability for personalised mailings. Integrated with the DocuMail system, advanced mail shots can be processed including a number of documents such as sales letters, price lists, brochures, reply cards, catalogues, CDs etc.

Plockmatic 49 SheetFeed

PLOCKMATIC - YOUR PARTNER IN DOCUMENT FINISHING PRODUCTS

Plockmatic 49 SheetFeed

The Plockmatic 49 sheet feeder with optional OMR capability is another addition to the DocuMail system. Thanks to the open design of the DocuMail, maximum flexibility is achieved by simply changing the position of the 3 different feeders available. Insertions can be made in C4, pocket or wallet type, or C5 envelopes. Documents of, in total, up to 12 mm thickness can be inserted.

Design your own mail shots including a personalised introductory letter and add combinations of your choice: a company catalogue, price lists, brochures, reply cards and envelopes, CDs etc. All material is automatically fed, in the chosen sequence, into the DocuMail where it is finally inserted and sealed.

Two Plockmatic 49 sheet feeders and the Plockmatic 46 booklet feeder linked to the DocuMail. Your personalised letter together with your company catalogue and a reply card inserted into a C4 envelope.

Three different feeders around the DocuMail. The Plockmatic 49-OMR sheet feeder, the Plockmatic 46 booklet feeder and the Plockmatic 310+ multi bin feeder. This configuration handles personalised mailings including up to 10 different brochures, one catalogue and your customised sales letter.

The position of the OMR sensor is easily adjustable. Add your OMR marks as desired and place the sensor accordingly. Place your printed documents in the feeder. Each set, regardless of the number of documents in the set, will be fed from the accumulator to the DocuMail.
